Problem

98% of ICO in 2017-2018 did not fulfill their obligations - SHITCOINS

Deceased projects collected money, and disappeared forever - SHITCOINS

Parody - lack of proper attention to the one who promises profit - SHITCOINS

SCAM projects - the financial losses of a huge number of investors - SHITCOINS

Tokens Shitcoins in wallet, dead money forever - SHITCOINS

The "JULLAR" project inculcates an innovative idea of collective unification to solve far from rare tragic situations related to blockchain investments. In accordance with the implementation of the plans of JULLAR company, it follows that the financing of any market requires openness and transparency, fairness and trust. The use of new and open investment technologies is not only an opportunity, but also moral obligations.

Exclude the financial losses of each blockchain technologies investor on the planet. We understand that it is one thing to come up with a revolutionary idea but the other one is to implement this idea in far going plans with a growth of capitalization. That is why managers, information technologies, blockchain-specialists and IT-developers will be involved to improve the available resources and search for new ideas uniting the JULLAR community in the world, on every continent, in every country with the only goal.

Blockchain has lacked the most important infrastructure elements and tools for creating applications so far, not to mention the positive experience of users.

Identification of ICO projects Scam, Parody, Deceased, Hack on the platform "ICO Scanning Jullar" for reliable investment of each User of the JULLAR project in promising and honest projects.

Mission

The mission of the «JULLAR» company is to improve relations between companies and investors and reduce financial risks of investors all over the world.

The "JULLAR" project is presented as an ecosystem of relations and motivation, creation of compensation chains and reward of the investor, involved in the development of decentralized applications, creation of decentralized services and blockchain alternative.

The task of the JULLAR project is to prove to the end-consumer that it is never late to correct the errors of investment losses. Gain confidence in investing in crypto-economic spheres, reveal respect and understanding for the potential of blockchain technologies.

The "JULLAR" company is focused on crypto investor on the continuous search for solutions to attract new sponsors, partners, like-minded people to the JULLAR platform. The common goal of the company is to realize the hopes of the community users of the JULLAR platform and ensure mutually beneficial relations between companies and investors.

The "JULLAR" project is developed to implement the main idea - to receive compensation for the elimination of User's Shitcoins on the GES platform.

The opportunity to take part in the duel tournament for crypto investors "Blockchain Joust Jullar". And also, to use the verification service of ICO projects, nobody will escape from lies "ICO Skanning Jullar".

The service that allows the user of the JULLAR project to find out the most reliable information about companies conducting ICO, included in the ICO catalog of projects on the "ICO Skanning Jullar" platform.

Solution

The "JULLAR" company provides our Users with an innovative proposal, creating a new community "JULLAR". The society itself is interested in uniting for liquidation of Shitcoins and returning of lost money in pockets of our members of community who have suffered from unsuccessful investment experience.

Among the other applicants in the market of blockchain industry on the whole, the company "JULLAR" provides our investors with an innovative proposal, creating a new community "JULLAR". The common goal is to fight against Shitcoins and the opportunity to return investments for each person, who to some extent suffered losses from the investments in Shitcoins.

The "JULLAR" project allows the investor to return the money spent on Shitcoins into the pocket and make a decision: to leave money in the pocket or redistribute own funds to reliable companies showing growth, effective work and benefit for the blockchain community.

The "JULLAR" project offers service of deep verification of ICO projects for reliability, quality assessment of smart contracts, token economy and other legal and economic studies in order to warn investors about the possible risk of investment losses.

Product

GES

The global eradication of Shitcoins

Liquidation of Shitcoins on the GES platform is a list of Users waiting for the liquidation queue (the burning function) of Shitcoins, and payment of compensation to Users for at least 0.00004 ETH for each liquidated Shitcoin token on the GES platform.

The user of the GES platform receives financial compensation in the equivalent of the Ethereum cryptocurrency equal to 0.00004 ETH per one Shitcoin for the liquidation of one Shitcoin.

The User can liquidate not more than 1,000 Shitcoin tokens for one place in the liquidation queue on the GES platform.

The JULLAR project will obligatorily hold a vote in the community about including new Shitcoin tokens on the GES platform.

The user of the GES platform can take every 20th place in the queue after the first placement of himself in the Shitcoins liquidation queue.

A User who participates in the GES platform can transfer to the platform account for liquidation no more than 10,000 tokens of each denomination from the Shitcoins list placed on the GES platform for liquidation.
